Professional Summary

Software Engineer II at **Deloitte USI** specializing in **Agentic AI, AI Security**, backend engineering and distributed systems. Building production-oriented agentic applications and enterprise AI systems using **Python, Java, LangGraph, LangChain, FastAPI and LLMs**. Strong foundation in scalable microservices, APIs, event-driven systems and reliability, with **66 merged open-source contributions** across AI/ML and Python ecosystems. Takes ambiguous problems from architecture to integration to production.

Technical Skills

AI / Agentic AI	Agentic AI, LLMs, RAG, AI Agents, Prompt Engineering, AI Evaluation, AI Security
AI Frameworks	LangGraph, LangChain, FastAPI, Hugging Face, OpenAI API, FAISS, ChromaDB
Languages	Python, Java, JavaScript, TypeScript, SQL
Backend	Spring Boot, Hibernate, JPA, REST APIs, Microservices
Systems	Distributed Systems, Event-Driven Architecture, Apache Kafka, Scalability
Databases / DevOps	PostgreSQL, MySQL, MongoDB, Redis, Docker, Kubernetes, CI/CD

Professional Experience

Deloitte USI | *Software Engineer II*

Sep 2026 – Present | Bengaluru

Working on Agentic AI and AI Security within an enterprise agentic application / harness platform.

Building agentic capabilities for engineering and security workflows, with focus on automation, integration, reliability and secure AI adoption.

Applying Java, Python, APIs, distributed-systems principles and agentic technologies to production-oriented enterprise solutions.

Infosys — Bank of America | *Senior Software Engineer*

Nov 2025 – Sep 2026 | Pune

Designed LLM-powered backend systems and AI-driven microservices using event-driven architecture; improved system efficiency by 40% through scalable architecture optimization.

Nexsys — Accelya | *Software Engineer*

Dec 2023 – Oct 2025 | Mumbai

Built scalable microservices processing 500K+ daily transactions.

Texala | *Software Engineer*

May 2023 – Dec 2023 | Pune

Developed production-grade microservices and scalable enterprise APIs.

Flyboard Ventures | *Software Engineer*

Aug 2022 – May 2023 | Chandigarh

Built scalable APIs while improving backend architecture, performance and reliability.

Open Source Contributions

66 merged contributions — pypdf, Joblib, Sentence Transformers, NLTK, Authlib

All PRs

Production-focused bug fixes, regression tests, API/type improvements, PDF processing, compatibility and reliability fixes, all through maintainer-reviewed pull requests.

Engineering Projects

Bench Resource Optimization System — *RAG + Multi-Agent AI*

Matches bench engineers to project needs: hybrid RAG (FAISS + BM25) with multi-agent CV parsing, skill matching and planning.

Hardened for production: semantic caching, circuit breakers, prompt-injection detection, SSE streaming and 222 tests.

Agentic Astro Insight Engine — *Multi-Agent AI Platform*

LangGraph multi-agent platform orchestrating reasoning and report-generation agents into personalized PDF reports via FastAPI.

Education

Future Institute of Engineering and Management | *B.Tech – Computer Science Engineering*

2014 – 2018 | CGPA: 8.7
