## Professional Summary

Senior AI Engineer with **4+ years of experience** building **LLM-powered systems, RAG pipelines, GenAI features, and scalable backend architectures** using Java and Python.

Specialized in **multi-agent orchestration, LangGraph workflows, AI-integrated microservices, and production-grade AI platforms** using Spring Boot, FastAPI, and Kafka. Experienced in designing systems that learn and improve through feedback loops, evaluation pipelines, and data-driven optimization.

## Technical Skills

|            |                                                                      |
|------------|----------------------------------------------------------------------|
| Languages  | Java, Python, JavaScript, TypeScript, SQL                            |
| AI/ML      | LLM APIs, Prompt Engineering, RAG, GenAI, NLP, Evaluation Techniques |
| Frameworks | Spring Boot, FastAPI, Hibernate, JPA                                 |
| AI Tools   | OpenAI API, MCP, LangChain, LangGraph, FAISS, Vector Databases       |
| Data       | Pandas, NumPy                                                        |
| Messaging  | Apache Kafka (real-time pipelines, async AI workflows)               |
| Databases  | PostgreSQL, MySQL, MongoDB                                           |
| DevOps     | Docker, Kubernetes, Redis, CI/CD                                     |
| Concepts   | Agentic AI, RAG, Distributed Systems, Microservices, Scalability     |

## Professional Experience

**Infosys — Bank of America** | *Senior Software Engineer* Nov 2025 – Present | *Pune*

- Designed LLM-integrated backend systems using Spring Boot and FastAPI for intelligent workflow automation.
- Built AI-driven microservices using event-driven architecture and real-time Kafka pipelines.
- Implemented Kafka-based data pipelines for continuous AI processing and decision flows.
- Improved system efficiency by 40% through optimized AI-integrated architecture.

**Nexsys — Accelya** | *Software Engineer* Dec 2023 – Oct 2025 | *Mumbai*

- Developed systems processing 500K+ daily transactions with AI-ready architecture using Spring Boot and PostgreSQL.
- Built asynchronous Kafka pipelines supporting real-time intelligent data processing.
- Designed scalable backend services and microservice-based integrations with REST APIs.

**Texala** | *Software Engineer* May 2023 – Dec 2023 | *Pune*

- Developed microservices using Spring Boot and maintained production-grade backend systems.
- Built scalable REST APIs and integrated enterprise applications with Hibernate/JPA.

**Flyboard Ventures** | *Software Engineer* Aug 2022 – May 2023 | *Chandigarh*

- Built scalable REST APIs supporting high-concurrency systems.
- Worked on backend architecture, performance tuning, and reliability improvements.

## Engineering Projects

**Agentic Astro Insight Engine** — *Multi-Agent AI System*

- Built a multi-agent LLM system using LangGraph orchestration to generate personalized life-insight reports from user queries.
- Designed LangGraph-based orchestration enabling collaboration across astrology, numerology, and reasoning agents.
- Implemented structured reasoning pipeline combining domain-specific agents with consensus generation.
- Developed end-to-end workflow from user input to dynamic PDF report generation.
- Integrated tarot, palmistry, numerology, and vastu reasoning into a unified AI consultation system.

**Bench Resource Optimization System** — *AI Agent System*

- Built a RAG-based AI system using FAISS and vector databases to map employee skills to project roles and identify gaps.
- Developed multi-agent pipeline for CV parsing, role mapping, planning, and tracking.
- Implemented FAISS-based retrieval for role matching using vector similarity search.
- Generated personalized preparation plans using LLM-based planning agents.
- Designed readiness scoring system to optimize resource allocation and deployment readiness.

## Education

**Future Institute of Engineering and Management** | *B.Tech - Computer Science Engineering* 2014 – 2018 | *CGPA: 8.7*
