Professional Summary

Senior AI Engineer with **4+ years of experience** building **LLM-powered systems, Agentic AI applications, RAG pipelines, and scalable backend architectures** using Python and Java.

Specialized in **multi-agent orchestration, LangGraph workflows, RAG with vector databases (FAISS), production LLM applications with FastAPI, and event-driven microservices with Apache Kafka**. Experienced in designing systems with prompt engineering, LLM evaluation, and deployment on AWS with Docker and Kubernetes.

Technical Skills

Languages	Java, Python, JavaScript, TypeScript, SQL
AI/ML	LLM APIs, Prompt Engineering, NLP, LLM Evaluation, Agentic AI
Frameworks	Spring Boot, FastAPI, Hibernate, JPA
AI Tools	OpenAI API, MCP, LangChain, LangGraph, FAISS, Pinecone, Vector Databases, RAG
Data	Pandas, NumPy
Messaging	Apache Kafka (event-driven systems, real-time pipelines, async AI workflows)
Databases	PostgreSQL, MySQL, MongoDB
DevOps	Docker, Kubernetes, AWS, Redis, CI/CD
Concepts	Agentic AI, RAG, Distributed Systems, Microservices, Scalability, Multi-agent Orchestration

Professional Experience

Infosys — Bank of America | *Senior Software Engineer*

Nov 2025 – Present | *Pune*

- Designed LLM-integrated backend systems enabling intelligent workflow automation using FastAPI and Spring Boot.
- Built AI-driven microservices using event-driven architecture with Apache Kafka and real-time pipelines.
- Implemented Kafka-based data pipelines for continuous AI processing and decision flows in production.
- Improved system efficiency by 40% through optimized AI-integrated architecture deployed on AWS with Docker.

Nexsys — Accelya | *Software Engineer*

Dec 2023 – Oct 2025 | *Mumbai*

- Developed systems processing 500K+ daily transactions with AI-ready architecture using Java and Python.
- Built asynchronous Kafka pipelines supporting real-time intelligent data processing for AI workflows.
- Designed scalable backend services and microservice-based integrations with Docker and Kubernetes.

Texala | *Software Engineer*

May 2023 – Dec 2023 | *Pune*

- Developed microservices and maintained production-grade backend systems using Spring Boot and FastAPI.
- Built scalable APIs and integrated enterprise applications with event-driven messaging.

Flyboard Ventures | *Software Engineer*

Aug 2022 – May 2023 | *Chandigarh*

- Built scalable APIs supporting high-concurrency systems using Python and Java.
- Worked on backend architecture, performance tuning, and reliability improvements with AWS.

Engineering Projects

Agentic Astro Insight Engine — *Multi-Agent AI System*

- Built a multi-agent LLM system using LangGraph orchestration to generate personalized life-insight reports.
- Designed LangGraph-based multi-agent orchestration enabling collaboration across domain-specific agents.
- Implemented structured RAG pipeline combining vector search (FAISS) with domain-specific reasoning agents.
- Developed end-to-end workflow from user input to dynamic PDF report generation using FastAPI.
- Integrated tarot, palmistry, numerology, and vastu reasoning into a unified AI consultation system with prompt engineering.

Bench Resource Optimization System — *AI Agent System*

- Built a RAG-based AI system using LangChain and FAISS to map employee skills to project roles.
- Developed multi-agent pipeline for CV parsing, role mapping, planning, and tracking with LangGraph.
- Implemented FAISS-based retrieval for role matching using vector similarity search in production.
- Generated personalized preparation plans using LLM-based planning agents with prompt engineering.
- Designed readiness scoring system to optimize resource allocation using LLM evaluation techniques.

Education

Future Institute of Engineering and Management | *B.Tech - Computer Science Engineering*

2014 – 2018 | *CGPA: 8.7*
