Professional Summary

Senior AI Engineer with **4+ years of experience** building **LLM-powered systems, Agentic AI applications, RAG pipelines, and scalable production-grade architectures.**

Specialized in **multi-agent orchestration, autonomous decision systems, LangGraph workflows, AI-integrated microservices, and production-grade AI platforms** using Python and Java. Experienced in designing systems that learn and improve through feedback loops, evaluation pipelines, and data-driven optimization.

Technical Skills

Languages	Java, Python, JavaScript, TypeScript, SQL
AI/ML	LLM APIs, Prompt Engineering, NLP, Evaluation Techniques, Fine-tuning, RLHF
Frameworks	Spring Boot, FastAPI, Hibernate, JPA
AI Tools	OpenAI API, MCP, LangChain, LangGraph, FAISS, Vector Databases (Pinecone, Weaviate)
Data	Pandas, NumPy, Databricks
Messaging	Apache Kafka (real-time pipelines, async AI workflows)
Databases	PostgreSQL, MySQL, MongoDB
DevOps	Docker, Kubernetes, Redis, CI/CD, AWS, Azure, GCP
Concepts	Agentic AI, RAG, Distributed Systems, Microservices, Scalability, Model Observability

Professional Experience

Infosys — Bank of America | *Senior Software Engineer* Nov 2025 – Present | Pune

- Designed LLM-integrated backend systems enabling intelligent workflow automation, including RAG and agentic flows.
- Built AI-driven microservices using event-driven architecture and real-time Kafka pipelines for production deployment.
- Implemented Kafka-based data pipelines for continuous AI processing and decision flows, ensuring scalability.
- Improved system efficiency by 40% through optimized AI-integrated architecture and model evaluation.

Nexsys — Accelya | *Software Engineer* Dec 2023 – Oct 2025 | Mumbai

- Developed systems processing 500K+ daily transactions with AI-ready architecture, including embedding pipelines.
- Built asynchronous pipelines supporting real-time intelligent data processing and model-routing infrastructure.
- Designed scalable backend services and microservice-based integrations for production-grade AI systems.

Texala | *Software Engineer* May 2023 – Dec 2023 | Pune

- Developed microservices and maintained production-grade backend systems with Python and Java.
- Built scalable APIs and integrated enterprise applications, ensuring robust deployment.

Flyboard Ventures | *Software Engineer* Aug 2022 – May 2023 | Chandigarh

- Built scalable APIs supporting high-concurrency systems, with focus on performance tuning and reliability.
- Worked on backend architecture, performance tuning, and reliability improvements for AI services.

Engineering Projects

Agentic Astro Insight Engine — *Multi-Agent AI System*

- Built a multi-agent LLM system to generate personalized life-insight reports from user queries, using RAG and tool orchestration.
- Designed LangGraph-based orchestration enabling collaboration across astrology, numerology, and reasoning agents with planning/execution flows.
- Implemented structured reasoning pipeline combining domain-specific agents with consensus generation and evaluation.
- Developed end-to-end workflow from user input to dynamic PDF report generation, deployed as microservices.
- Integrated tarot, palmistry, numerology, and vastu reasoning into a unified AI consultation system with model-routing.

Bench Resource Optimization System — *AI Agent System*

- Built a RAG-based AI system to map employee skills to project roles and identify gaps, using embeddings and vector search.
- Developed multi-agent pipeline for CV parsing, role mapping, planning, and tracking, with agentic frameworks.
- Implemented FAISS-based retrieval for role matching using vector similarity search, leveraging vector databases.
- Generated personalized preparation plans using LLM-based planning agents, with fine-tuning for domain adaptation.
- Designed readiness scoring system to optimize resource allocation and deployment readiness, with model observability.

Education

Future Institute of Engineering and Management | *B.Tech - Computer Science Engineering* 2014 – 2018 | CGPA: 8.7
