Professional Summary

Senior AI Engineer with **6+ years of experience** architecting and deploying **AI-powered services, LLM systems, RAG pipelines, and scalable backend architectures** on Microsoft Azure.

Specialized in **multi-agent orchestration, autonomous decision systems, LangGraph workflows, AI-integrated microservices, and production-grade AI platforms** using Python and Java. Experienced in designing systems that learn and improve through feedback loops, evaluation pipelines, and data-driven optimization. Proficient in Azure AI Foundry, Azure OpenAI, and CI/CD with Azure DevOps.

Technical Skills

Languages	Java, Python, JavaScript, TypeScript, SQL
AI/ML	LLM APIs, Prompt Engineering, NLP, Evaluation Techniques, Azure OpenAI, Azure AI Foundry
Frameworks	Spring Boot, FastAPI, Hibernate, JPA, Streamlit
AI Tools	OpenAI API, MCP, LangChain, LangGraph, FAISS, Vector Databases, RAG
Data	Pandas, NumPy
Messaging	Apache Kafka (real-time pipelines, async AI workflows)
Databases	PostgreSQL, MySQL, MongoDB
DevOps	Docker, Kubernetes, Redis, CI/CD, Azure DevOps, Git
Concepts	Agentic AI, RAG, Distributed Systems, Microservices, Scalability, Secure API Development

Professional Experience

Infosys — Bank of America | *Senior Software Engineer* Nov 2025 – Present | Pune

- Architected and developed AI-powered services using Azure OpenAI and LLMs for intelligent workflow automation.
- Built AI-driven microservices using event-driven architecture and real-time pipelines with Kafka.
- Implemented Kafka-based data pipelines for continuous AI processing and decision flows.
- Improved system efficiency by 40% through optimized AI-integrated architecture and scalable deployment.

Nexsys — Accelya | *Software Engineer* Dec 2023 – Oct 2025 | Mumbai

- Developed systems processing 500K+ daily transactions with AI-ready architecture on Azure.
- Built asynchronous pipelines supporting real-time intelligent data processing and RAG-based retrieval.
- Designed scalable backend services and microservice-based integrations with secure APIs.

Texala | *Software Engineer* May 2023 – Dec 2023 | Pune

- Developed microservices and maintained production-grade backend systems using Python and Java.
- Built scalable APIs and integrated enterprise applications with CI/CD pipelines.

Flyboard Ventures | *Software Engineer* Aug 2022 – May 2023 | Chandigarh

- Built scalable APIs supporting high-concurrency systems with performance tuning.
- Worked on backend architecture, reliability improvements, and secure API development.

Engineering Projects

Agentic Astro Insight Engine — *Multi-Agent AI System*

- Built a multi-agent LLM system using LangGraph orchestration to generate personalized life-insight reports.
- Designed agent collaboration across domain-specific agents with consensus generation and RAG for knowledge retrieval.
- Implemented structured reasoning pipeline combining domain-specific agents with consensus generation.
- Developed end-to-end workflow from user input to dynamic PDF report generation using Azure OpenAI.
- Integrated tarot, palmistry, numerology, and vastu reasoning into a unified AI consultation system.

Bench Resource Optimization System — *AI Agent System*

- Built a RAG-based AI system using FAISS vector similarity search to map employee skills to project roles.
- Developed multi-agent pipeline for CV parsing, role mapping, planning, and tracking with LangGraph.
- Implemented FAISS-based retrieval for role matching using vector similarity search and Azure AI services.
- Generated personalized preparation plans using LLM-based planning agents with Azure OpenAI.
- Designed readiness scoring system to optimize resource allocation and deployment readiness.

Education

Future Institute of Engineering and Management | *B.Tech - Computer Science Engineering* 2014 – 2018 | CGPA: 8.7
