Portfolio

Professional Summary

Agentic AI Engineer at **Deloitte (Cyber – Agentic AI Engineering & Security)** with **4+ years of experience** building production-grade systems using **LLMs, Agentic AI, RAG, LangGraph, FastAPI, Python, and Java**. Works forward-deployed: close to the problem, shipping secure multi-agent systems into real environments. **66 merged pull requests** across pypdf, Joblib, Hugging Face, NLTK and Authlib.

Technical Skills

Languages	Java, Python, JavaScript, TypeScript, SQL
AI/ML	LLMs, Agentic AI, RAG, Prompt Engineering, NLP, AI Evaluation
AI Security	LLM Guardrails, Prompt-Injection Defence, PII Filtering, Output Validation
Frameworks	Spring Boot, FastAPI, Hibernate, JPA
AI Tools	OpenAI API, Hugging Face, LangChain, LangGraph, FAISS, ChromaDB
Data	Pandas, NumPy
Messaging	Apache Kafka
Databases	PostgreSQL, MySQL, MongoDB
DevOps	Docker, Kubernetes, Redis, CI/CD
Concepts	Agentic AI, RAG, Distributed Systems, Microservices, Scalability

Open Source Contributions

66 merged PRs — pypdf (59), Joblib (3), Sentence Transformers (2), NLTK (1), Authlib (1) All PRs

pypdf (10k+ stars): 59 merged fixes making the PDF library robust to malformed real-world files — crashes turned into clear errors or safe recovery, each reproduced first and covered by tests.

Joblib: fixed `os.PathLike` support in `dump()/load()`; regression tests for Sentence Transformers; fixes in NLTK and Authlib.

Sustained maintainer collaboration through code review, coverage gates and CI across five external projects.

Professional Experience

Deloitte | *Agentic AI Engineer — Cyber*

Sep 2026 – Present | Bengaluru

Agentic AI Engineering & Security team: engineering agentic AI systems with guardrails, tool-use boundaries and prompt-injection defence designed in.

Infosys — Bank of America | *Senior Software Engineer*

Nov 2025 – Sep 2026 | Pune

Designed LLM-powered backend systems and AI-driven microservices using event-driven architecture.

Improved system efficiency by 40% through scalable architecture optimization.

Nexsys — Accelya | *Software Engineer*

Dec 2023 – Oct 2025 | Mumbai

Built scalable backend services processing 500K+ daily transactions using microservice architecture.

Texala | *Software Engineer*

May 2023 – Dec 2023 | Pune

Developed production-grade microservices and scalable enterprise APIs.

Flyboard Ventures | *Software Engineer*

Aug 2022 – May 2023 | Chandigarh

Built scalable APIs while improving backend architecture, performance, and reliability.

Engineering Projects

Agentic Astro Insight Engine — *Multi-Agent AI Platform*

Built a multi-agent AI platform using LangGraph and LLMs to generate personalized life-insight reports.

Designed agent orchestration combining numerology, astrology, reasoning, and report-generation workflows.

Implemented structured reasoning with dynamic PDF generation using FastAPI and Python.

Bench Resource Optimization System — *RAG + Multi-Agent AI*

Built a RAG-based AI platform mapping employee skills to project requirements using vector search.

Implemented multi-agent workflow for CV parsing, skill matching, planning, and personalized learning paths.

Integrated FAISS retrieval with LLM planning agents to generate customized preparation roadmaps.

Education

Future Institute of Engineering and Management | *B.Tech – Computer Science Engineering*

2014 – 2018 | CGPA: 8.7
