

Chandan Kumar

Forward Deployed AI Engineer | Agentic AI · Full-Stack · AI Security

📞 +91 62909 09518 ✉️ ravchandan15@gmail.com 🐙 [GitHub](#) 🔗 [LinkedIn](#) 🌐 chandankumar-engineer.vercel.app

Professional Summary

Software engineer with **4+ years** building backend and distributed systems for banking and aviation, now working on **Agentic AI and AI Security at Deloitte USI**. Takes a problem from scoping to production: builds the full stack (Python/Java, Angular/React, LangGraph agents), integrates it with existing systems, hardens it with tests and guardrails, then ships and runs it. Built and runs **three live, multi-tenant AI products** solo, and has **71 pull requests merged** into open-source libraries such as pypdf and fontTools.

Technical Skills

Agentic AI	LLMs, LangGraph, LangChain, multi-agent systems, tool calling, RAG, AI evaluation
Full-Stack	Python, Java, TypeScript, FastAPI, Spring Boot, Angular, React, REST, SSE / WebSockets
Integration	SDKs, JWT / RBAC, multi-tenant APIs, Kafka, event-driven systems, LLM provider abstraction
Production	Docker, Kubernetes, AWS, Vercel, Render, CI/CD, Redis, PostgreSQL, caching, observability
AI Security	Prompt-injection defence, PII protection, output validation, guardrails, secure tool use
Delivery	Discovery and scoping, system design, technical writing, demos, code review

Professional Experience

Deloitte USI | *Software Engineer II* Sep 2026 – Present | Bengaluru

- Build agentic AI capabilities on an enterprise agent platform used for engineering and security workflows.
- Focus on fitting agents into existing workflows, making them reliable, and adopting AI securely (Agentic AI & AI Security team).

Infosys — Bank of America | *Senior Software Engineer* Nov 2025 – Sep 2026 | Pune

- Integrated LLM APIs into Spring Boot services and built event-driven AI microservices on Kafka in a regulated banking environment, improving system efficiency by 40%.

Nexsys — Accelya | *Software Engineer* Dec 2023 – Oct 2025 | Mumbai

- Built and scaled Java microservices for airline systems handling 500K+ transactions a day.

Texala | *Software Engineer* May 2023 – Dec 2023 | Pune

- Built production microservices and enterprise REST APIs.

Flyboard Ventures | *Software Engineer* Aug 2022 – May 2023 | Chandigarh

- Shipped e-commerce, healthcare and e-learning products end to end, including APIs serving thousands of concurrent users.

Live AI Products & Projects

Aura with Rav | aurawithrav.com Live · built and run solo

- Public AI product: Angular on Vercel, Dockerized FastAPI + LangGraph on Render, custom domain, sign-up and health monitoring.
- Multi-agent pipeline with prompt-injection checks, domain agents, a hallucination check and human approval before any answer is released.

Aaina | aaina-ai.vercel.app Live · built and run solo

- AI consultation app for salons in 11 languages: seven agents run as a YAML-defined DAG with schema checks and rule fallbacks; face shape measured on the phone (MediaPipe); multi-tenant sign-in with signed keys and daily cost caps.

Poultry 360 | poultry-360.onrender.com Live · built and run solo

- AI assistant for poultry farms in 13 Indian languages: YOLO11 (ONNX) counts birds from a photo or video on CPU; feed advice only from cited NRC/BIS tables; multi-tenant, Docker on Render.

Bench Resource Optimizer RAG + multi-agent system

- Matches bench engineers to project needs with hybrid RAG (FAISS + BM25) and multi-agent planning; semantic caching, circuit breakers, injection detection, 222 tests.

Open Source

71 merged pull requests in pypdf (63), fontTools, Joblib, Sentence Transformers, NLTK and Authlib: bug fixes with regression tests, each reviewed and merged by the project maintainers. [See all](#)

Education

Future Institute of Engineering and Management | *B.Tech – Computer Science Engineering* 2014 – 2018 | CGPA: 8.7
