Chandan Kumar

Forward Deployed AI Engineer | Agentic AI · Full-Stack · AI Security

Bengaluru, India | +91 62909 09518 | ravchandan15@gmail.com | RavSinghChandan | LinkedIn | Portfolio

Summary

Engineer who takes a messy, real-world problem from first conversation to a product people use. **4+ years** building backend and distributed systems for banking and aviation; now on **Agentic AI and AI Security at Deloitte USI**. Built and runs **three live, multi-tenant AI products** solo, two of them for small businesses whose users may not read English. **103 pull requests merged** into open-source libraries such as pypdf and fontTools.

Experience

Deloitte USI | *Software Engineer II, Agentic AI & AI Security* — Sep 2026 – Present | *Bengaluru*

- Build agentic AI capabilities on an enterprise agent platform used for engineering and security workflows.
- Focus on fitting agents into existing workflows, making them reliable, and adopting AI securely.

Infosys — Bank of America | *Senior Software Engineer* — Nov 2025 – Sep 2026 | *Pune*

- Integrated LLM APIs into Spring Boot services and built event-driven AI microservices on Kafka in a regulated banking environment, improving system efficiency by 40%.

Nexsys — Accelya | *Software Engineer* — Dec 2023 – Oct 2025 | *Mumbai*

- Built and scaled Java microservices for airline systems handling 500K+ transactions a day.

Texala | *Software Engineer* — May 2023 – Dec 2023 | *Pune*

- Built production microservices and enterprise REST APIs.

Flyboard Ventures | *Software Engineer* — Aug 2022 – May 2023 | *Chandigarh*

- Shipped e-commerce, healthcare and e-learning products end to end, including APIs serving thousands of concurrent users.

Deployed AI Products — each scoped, built, shipped and run solo

Poultry 360 | poultry-360.vercel.app — *Live · YOLO11, FastAPI, Angular, Docker*

- Farmers count birds by hand and guess feed. Built a YOLO11 (ONNX) model that counts birds from a photo or video on a plain CPU, and feed advice drawn only from cited NRC/BIS tables.
- Made for low-literacy users: 13 Indian languages, read-aloud; evals in CI caught Hinglish sick-flock reports misrouted (5/13) and fixed routing and the invented-number guard to 100%; ops panel, multi-tenant.

Aaina | aaina-ai.vercel.app — *Live · multi-agent, MediaPipe, FastAPI, Angular*

- AI consultation for salons in 11 languages: seven agents run as a YAML-defined DAG; live evals found the model broke customers' dislikes in 3 of 15 answers, so the harness now enforces them in code with one repair retry (100%).

Aura with Rav | aurawithrav.com — *Live · LangGraph, FastAPI, Angular*

- Consumer AI product on a custom domain: multi-agent LangGraph pipeline with prompt-injection checks, a hallucination check and human approval before any answer is released.

Bench Resource Optimizer | *enterprise staffing* — *RAG, multi-agent*

- Matches bench engineers to project needs with hybrid RAG (FAISS + BM25) and multi-agent planning; semantic caching, circuit breakers and injection detection.

Open Source

103 merged pull requests in pypdf (68), fontTools, Pillow, fpdf2, pydantic-extra-types, Joblib, Sentence Transformers, NLTK and Authlib: bug fixes with regression tests, each reviewed and merged by the project's maintainers. See all

Skills

AI & Agents	LLMs, LangGraph, LangChain, multi-agent systems, tool calling, RAG, LLM evals in CI, ONNX / YOLO
Backend	Python, Java, FastAPI, Spring Boot, Kafka, REST, SSE / WebSockets, PostgreSQL, Redis
Frontend	TypeScript, Angular, React
Cloud & Ops	Docker, Kubernetes, AWS, Vercel, Render, CI/CD, observability
AI Security	Prompt-injection defence, PII protection, output validation, guardrails, multi-tenant auth (JWT / RBAC)

Education

Future Institute of Engineering and Management | *B.Tech* — 2014 – 2018 | *CGPA: 8.7*
