

CHANDAN KUMAR.

Software Engineer II, Deloitte USI | Forward Deployed AI Engineering — Agentic AI · Full-Stack · AI Security

📞 +91 62909 09518 ✉️ ravchandan15@gmail.com 🌐 aurawithrav.com (live) 🐙 GitHub 📁 66 Merged PRs 🔗 LinkedIn 📁 Portfolio

Professional Summary

Software Engineer II at Deloitte USI (Agentic AI & AI Security) who works the forward-deployed way, taking ambiguous problems all the way to production: **scope** the problem, **build** the full stack (Python/Java backends, Angular/React frontends, LangGraph agents), **integrate** with existing systems, **harden** it with tests and guardrails, and **ship and run** it. Owns a live AI product end to end at aurawithrav.com. 4+ years of backend and distributed-systems engineering in banking and aviation, and **66 open-source PRs merged** after review by external maintainers.

Technical Skills

Agentic AI	LLMs, LangGraph, LangChain, multi-agent systems, tool calling, RAG, AI evaluation
Full-Stack	Python, Java, TypeScript, FastAPI, Spring Boot, Angular, React, REST, SSE / WebSockets
Integration	SDKs, JWT / RBAC, multi-tenant APIs, Kafka, event-driven systems, LLM provider abstraction
Production	Docker, Kubernetes, AWS, Vercel, Render, CI/CD, Redis, PostgreSQL, caching, observability
AI Security	Prompt-injection defence, PII protection, output validation, guardrails, secure tool use
Delivery	Discovery and scoping, system design, technical writing, demos, code review

Professional Experience

Deloitte USI | *Software Engineer II* Sep 2026 – Present | Bengaluru

Agentic AI and AI Security on an enterprise agentic application / harness platform for engineering and security workflows.
Building agentic capabilities with a focus on integration into existing workflows, reliability and secure AI adoption.

Infosys — Bank of America | *Senior Software Engineer* Nov 2025 – Sep 2026 | Pune

Integrated LLM APIs into Spring Boot services and built event-driven, Kafka-based AI microservices inside a regulated banking environment; improved system efficiency by 40%.

Nexsys — Accelya | *Software Engineer* Dec 2023 – Oct 2025 | Mumbai

Built scalable microservices for aviation systems processing 500K+ daily transactions.

Texala | *Software Engineer* May 2023 – Dec 2023 | Pune

Developed production-grade microservices and scalable enterprise APIs.

Flyboard Ventures | *Software Engineer* Aug 2022 – May 2023 | Chandigarh

Shipped e-commerce, healthcare and e-learning products end to end, including APIs serving thousands of concurrent users.

Production & Engineering Projects

Aura with Rav — live in production — aurawithrav.com Owner, end to end

Designed, built, deployed and run a public AI product: Angular front end on Vercel, Dockerized FastAPI + LangGraph back end on Render, custom domain, HTTPS, sign-up and health monitoring.

Multi-agent pipeline with security and persona-injection checks, domain agents, a hallucination check, a grammar pass and human approval before a reading is released.

Bench Resource Optimizer — Enterprise problem → RAG + multi-agent system

Matched bench engineers to project needs with hybrid RAG (FAISS + BM25) and multi-agent planning; hardened with semantic caching, circuit breakers, injection detection and 222 tests.

Universal Agent — Integration without rewrites

One agent engine embedded in 4 apps through Angular, React and JS SDKs plus YAML config; LLM provider switched by configuration.

Open Source

66 merged contributions — pypdf (59), Joblib, Sentence Transformers, NLTK, Authlib — bug fixes, regression tests and reliability fixes, each through external maintainer review. All PRs

Education

Future Institute of Engineering and Management | *B.Tech – Computer Science Engineering* 2014 – 2018 | CGPA: 8.7
